

My Chiropractic Experience

“MY CARPAL TUNNEL IS COMPLETELY GONE AFTER 8 YEARS!!!!

I started chiropractic care because I had terrible back and neck pain. I also had plantar fasciitis so bad that I could hardly function. I have also had carpal tunnel syndrome for 8 years. My pain got so bad that I quit doing everything I loved. I work for the postal service so when I would get home at night I would literally have to drag myself around on the floor because it was to painful to walk anymore. The best way to describe the feeling is every time I take a step it felt like there was a steel rod going through my feet. I had maxed out of cortisone shots and had tried every pill, shot, or cream known to man. I have a passion for animals and sports. Not only could I not play sports I couldn't even take my dogs for a walk. I have tried going to a chiropractor before but I have never had any long term results. They would take away the symptom, but never get the root of the problem. Since beginning care in the office MY CARPAL TUNNEL HAS GONE AWAY COMPLETELY AFTER 8 YEARS!!!! My pain is getting better and better everyday. I have been able to start exercising and my plantar fasciitis is better than it has ever been. My life is easier to live day by day because I don't have to plan it around my pain.

I FEEL GREAT!!!
