

My Chiropractic Experience

“I now sleep through the night, and the diarrhea and vomiting stopped 2 days after starting care.”

My name is Alex and I began chiropractic care at seven months because my mom was concerned about my digestion. For about three weeks, I had constant diarrhea and vomiting. I was a very crabby baby. I didn't sleep or eat well, and my mom and dad were stressed and worried about me. My mom also had to do a lot of laundry because of me. At its worst, I would vomit uncontrollably after eating. It was very scary for me, and my mom and dad. My mom tried changing my diet, and then she heard about chiropractic from my Aunt Andrea. Since beginning care, I now sleep through the night, and the diarrhea and vomiting stopped 2 days after starting care. I am much happier now. My mom says I have lots of energy. This office is great because the people here care about their patients and it shows. My mom and dad are next to get their nervous systems checked. My mom has learned a lot about health since she started bringing me and is continuing to learn.
