

My Chiropractic Experience

“I HAVEN’T HAD AN EPISODE SINCE I STARTED!!!!”

I started Chiropractic care because I was having chronic neck pain. I was in a car accident in 1987 and I have never been the same since. I also suffer from Meniere's disease which is a disorder of the inner ear with effects hearing and balance. I would get such bad episodes that I couldn't move at all. I was extremely stiff and felt immobile. I couldn't perform simple daily activities.

The worst was when I had an episode and for 33HOURS, if I would slightly even turn my head I would vomit. The other chiropractors I have been to have only showed me short-term results. My pain would go away, but sure enough it would always come back. Since starting care I haven't had an episode since. I feel like I am an overall healthier person. My neck pain is better and I feel I even move around easier.
