

My Chiropractic Experience

“I had trouble getting pregnant before, and this last pregnancy I didn’t have to use any fertility medication!”

The reason we began chiropractic care was more because of wellness. We didn’t know very much about chiropractic except that it treated my husbands back pain. I didn’t know that it was for everything.

Since starting care, I have noticed that the kids get over sicknesses faster, and they don’t get sick as much. For myself, I had trouble getting pregnant before, and this last pregnancy I didn’t have to use any fertility medication. I also noticed that my menstrual cycle has been regular under chiropractic care.

Our family has a total of seven people under chiropractic care, and not very many kids at the children’s school see a chiropractor regularly. I wish that more people knew about the benefits of chiropractic care.
