

# My Chiropractic Experience

“My previous attitude with Chiropractic was all ‘horror stories!’

The reason Abigail began Chiropractic care was due to speech problems and being a “toe-walker”, which caused the ‘need’ for braces on her legs and feet. Abigail’s problems existed since she started to walk and the speech problems were noted by her teacher and she was sent to a speech therapist.

Abby fell and tripped a lot due to the problems with her feet. She also had many ear infections throughout childhood.

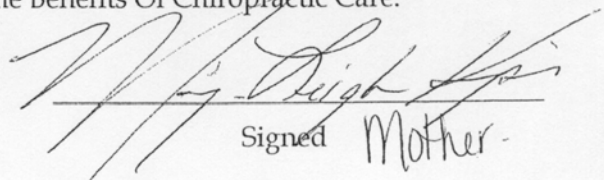

The treatment Abby received before Chiropractic consisted of braces on her legs, speech therapy, medical specialists, and antibiotics for ear infections. My previous attitude with Chiropractic was all “horror stories!”

The progress she has made is wonderful. She didn’t have to use the 2<sup>nd</sup> pair of leg braces and the foot doctor was amazed at her progress in 6 months, all from Chiropractic care – (I told him we didn’t use the braces after he noted the progress!)

Abby walks much better with less tripping and falling. Her speech was measured at 10-11 months behind and now she is 2-3 months ahead of others her age. Abigail was referred to Ochsner Chiropractic by me, her mother, who knew of the office from getting massages there.

I love the office staff and Dr. Ashly. They are wonderful with our kids and us. I highly recommend them!
