

My Chiropractic Experience

“After my girls get adjusted...they are calmer, sweeter, and are more attentive”

My name is Angela Reynolds, and my daughters and I began care for a number of reasons. I had stomach pain, Barrett’s esophagus, gurd, lower back pain and for general health. I had the girls checked for general wellness care. At its worst I had stomach pains every other night and it would actually keep me up at night. My sleep was suffering. I had been on prescription medication for 2 to 3 years with no relief. Since beginning care, my stomach pains have stopped. I started care 4 months ago and I haven’t had pains for the last 3 months. My lower back pain is completely gone. Even though I started the girls for general wellness care, I have noticed changes in their behavior. After they get adjusted, they have a burst of energy, and then they are very calm, sweet, and more attentive. Some other things I have noticed are that we have not really been sick. There have been a couple of running noses, but it only lasted a day. I was referred here by my neighbor, and after hearing about how chiropractic works, it made sense for my family to be under care here.
